PROFILE

I'm a tech enthusiast based in Montreal, Quebec. I focus on Web Development, along with building user friendly designs and helping customers. My work primarily focuses on creating intuitive user-facing applications that allow users to explore new ideas, information and express themselves. Additionally, I love collaborating with other people and enjoy learning new skills that I can apply in my work. When not coding or designing, you'll usually find me playing basketball or an online game.

WORK EXPERIENCE

Software Developer at Radiant Insurance Company March 2021 - Present

- Created a custom Mail management system for Radiant Insurance using JavaScript (VueJs) and AWS.
- While the system was in production, I made sure to manage and address any difficulties and updates that were needed.
- Design solutions that are modular, scalable and portable
- Answer business stakeholders' queries about the platform
- Develop new solutions to resolve ongoing issues with the platform
- Work to improve overall system architecture and design components to meet business goals
- Was able to enroll all the 25+ Employees of the Claim Department

Computer Science/ IT teacher at Excella Secondary School March 2021 - July 2021

- Prepare subject material for presentation according to the school curriculum
- Prepare, administer, and correct tests
- Be nurturing and patient; incorporate play and social emotional learning.
